Notice of Allowability	Examiner	Art Unit
	Toan Ton	2871
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to papers filed 08/11/04.		
2. The allowed claim(s) is/are <u>1-7 and 13-24.</u>		
3. The drawings filed on 14 February 2002 are accepted by the Examiner.		
 4. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-{d} or (f). a) All b)		
Attachment(s) 1. ☑ Notice of References Cited (PTO-892) 2. ☐ Notice of Draftperson's Patent Drawing Review (PTO-948) 3. ☐ Information Disclosure Statements (PTO-1449 or PTO/SB/06 Paper No./Mail Date 4. ☐ Examiner's Comment Regarding Requirement for Deposit of Biological Material	6. ☐ Interview Summary Paper No./Mail Date 8), 7. ☐ Examiner's Amendm	ie

Art Unit: 2871

REASONS FOR ALLOWANCE

1. Claims 1-7 and 13-24 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a reflective active-matrix addressed liquid crystal display (LCD) device comprising a combination of various elements as claimed, more specifically, a combination of the followings: an upper electrode between the insulation layer and the lower insulation film, the upper electrode being provided for each pixel and located in a region wherein the reflection film is provided, the upper electrode being electrically coupled to a source electrode of the switching element; a lower electrode provided between the second substrate and the lower insulation film, the lower electrode forming a storage capacitance with the upper electrode; and the irregularly configured surface of the insulation layer comprises a plurality of substantially linear projections, a plurality of recesses surrounded by the substantially linear projections (see at least figure 4A of the present application).

Kanou ('718, same assignee) discloses a reflective active-matrix LCD device comprising the irregularly configured surface of the insulation layer having a plurality of linear projections, a reflection film formed on the insulation layer and having an irregular surface. However Kanou fails to disclose the particular details of the insulation layer in combination with the electrodes' (upper and lower) particular details, as recited in the present claimed invention.

Art Unit: 2871

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONTACT INFORMATION

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan Ton whose telephone number is (571) 272-2303.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
